

Complete Keller Software Download Contents

Kolibri Mobile

Android app to communicate with KELLER Bluetooth Classic and Bluetooth Low Energy devices

Driver K-104 / K-114

USB-driver for Interface converter K-104 and K-114.

DriverManometer

USB-driver for LEO 5.

Installer ControlCenterSeries30

Pressure measurements can be displayed and recorded on PC or Laptop with help of the software ControlCenterSeries30 (CCS30) and a serial interface cable.

Export of recordings to usual file formats possible.

Up to 128 devices can be connected together into a KELLER Bus-system.

ConductivityCalibration Tool

Software for calibration of Conductivity Sensor built into Serie 36 Xi W (CTD) Level Transmitter.

Installer Logger 5

Software for read-out and configuration of data loggers. The data can be processed i.e. graphical representation, exportation, compensation of ambient pressure as well as conversion into water level. The online function shows actual measurements of the device.

GSM Setup

This program allows the configuration of the remote data transmission unit GSM-2. When installing the GSM-2 on site, the user can set the installation data and transfer the entire configuration to the Datamanager in which the unit is automatically registered.

GSM 2 Datamanager

The PC-Software GSM-2 Datamanager collects and displays measuring data from the GSM-2 Modules. The data is saved in a database.

ManoConfig

Allows the configuration of the digital manometers (unit selection, calibration, ...).

Pressure Switch Console

Software for the configuration of pressure switches.

Castello Setup

Software to configure the tank content calculations of the digital indicator Castello.

K114Config

Allows the configuration and diagnosis of the interface converter K-114 (terminal resistor, network bias, echo, Baud rate, etc.)

Installer D-Line Address Manager

This software allows to change I2C Slave Address of D-Line Transmitter and shows the scaling and other product information.

RFID-Software

Short description of the Software tools related to the Pressure Transponders / Data Loggers Series 21 D(C) RFID as well as links and hints for the installation.
